Project Name	Customer Registry
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming is a collaborative process where team members freely generate ideas to solve a problem without criticism. It encourages creativity, innovation, and teamwork. After collecting ideas, the team evaluates and prioritizes the best solutions based on feasibility, impact, and implementation effort. This process helps identify effective approaches for developing a reliable Customer Care Registry system.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Problem Statement

Develop a Customer Care Registry web application that enables customers to register complaints, track issue status, submit feedback, and communicate with support representatives. The system should help organizations efficiently manage customer requests, maintain interaction history, generate reports, and improve customer satisfaction through timely issue resolution.

Step-2: Brainstorm, Idea Listing and Grouping

Frontend

- Design responsive React.js user interface.
- Create complaint registration form.
- Customer dashboard for complaint tracking.
- Feedback submission page.

Backend

- Develop REST APIs using Express.js.
- Implement complaint management services.
- Store complaint history.
- Manage user authentication.

Database

- Design MongoDB collections.
- Store customer details securely.
- Maintain complaint records.

- Store feedback information.

Authentication

- User Login.
- Admin Login.
- Password Encryption.
- Session Management.

Reports

- Complaint Analytics.
- Status Reports.
- Customer Feedback Reports.
- Monthly Complaint Summary.

Deployment

- GitHub Repository.
- Testing using Postman.
- Application Deployment.
- Bug Fixing.

Step-3: Idea Prioritization

High Priority

- Complaint Registration
- Customer Login
- Complaint Tracking
- Admin Dashboard
- MongoDB Database
- REST API Development

Medium Priority

- Feedback Module
- Search Complaint
- Complaint Reports
- Notification Feature

Low Priority

- Theme Customization
- Export Reports
- Advanced Analytics
