Customer Problem Statement Template:

The following matrix outlines the core challenges faced by our users, framed from their explicit perspective to guide our development priorities for the Customer Care Registry.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1(End Customer Perspective)	A regular digital consumer who expects quick, clear technical support when a product fails	Submit a clear support ticket and easily track its progress until it is resolved.	My complaints get lost in disconnected channels, and I have no real-time status updates.	The company lacks a centralized, automated registry database to properly track issues.	Frustrated , anxious, and ignored by the brand.
PS-2(Support Agent Perspective)	A busy customer care executive handling hundreds of inquiries daily	Quickly look up past customer history and analyze recurring complaint trends.	I waste time sorting through unorganized logs and manually finding recurring pain points.	The current tools are slow, outdated, and lack built-in search filters and trend analytics.	Overwhelmed , unproductive, and stressed
